

LING

Stefi is a wise that knowledge in this field.

She came to class very prepared and I enjoyed the first half of the semester.

After spending half a semester learning and using R, I am still not sure how to apply it to anything other than searching for concordances and free lists. I think Antlone is more applicable, and easier, for any corpus work I would do in future.

Stefi treated the class as though we were UG's, gave us busy work - homework and article summary - in order to calculate a grade. I don't know grad students who write article summaries without a critical eye and in this stage of my education I don't want to "summarize" what someone else wrote without including a critique.

Stefi showed preference for a couple of students in the class and seemed to pace her teaching on whether or not they followed her. There were several times that students were not following her and she kept going instead of explaining the material until it was understood. The last few weeks of class were helpful since we learned how to apply some of what was taught in the class. Stefi also use coarse language often, which is offensive to me.

ESL major

Steffi is a great instructor! She always came prepared, started class promptly, and she was very organized,

She was also very fair in her grading, respectful of group and/or individual concerns.

I was very impressed with her teaching skill.

1. Major in ESL
2. Dr. Wulff has an outstanding knowledge on this field. She was able to provide very useful tools to be applied in the ESL classroom. She also demonstrated the value of corpus linguistics as one of the best ways to learn and teach English.

Master's in TESOL

Stefanie knows tons about Corpus Linguistics and the research side of it. However, she doesn't know how to convey the information to the students. I was always lost and it seemed as though her focus was on helping 2 particular guys in class instead of others of us who were having problems. There was way too much busy work, which seemed to be assigned for no other reason than to have a concrete grade for us. She treated us like undergrads or high school students, not grad students. She seemed to get offended when we asked her to repeat or simplify something or to model it on the overhead. She rarely modeled on the overhead for us; instead, she gave us something to do and would walk around to answer individual students' questions, which wasted so much time or left us frustrated and unmotivated because we just sat in front of computers — lost. It would've saved so much time if she would've modeled for the entire class, so we could see how to do it first. We spent way too much time on R, which is useless to me. I learned nothing + ..

For the nature of the course, the instructor made it as pleasant as possible. She is a great teacher and an expert in her field. Overall, the class was a joy, despite the computers.

1. Master's degree in linguistics

2. The teacher explains clearly hard topics, mainly using a lot of examples; which is really helpful.

MEI / applied linguistics

She is an excellent professor who is patient, tolerant and overall who dominates in an amazing way her field.

Excellent professor!

1. Teaching ESL

2. I very much enjoyed this class.

The instructor was always prepared, well-organized, and efficient.

I wish ~~the~~ more focus could have been made on the applicability of corpora in language teaching, which means more practical assignments for making lesson plans, etc.

Great job, Steffi!

- LINGUIST

Prof. was great prof. She was always available to answer questions. She really worked hard to tailor what the class covered to meet our needs and interests - even to the point of changing some things to more meet our needs. She was a very fair grader and always returned homework and tests promptly and with helpful comments.

ESL - MA

Steffi was very helpful when I had questions.
She was willing & available to meet in her office
and worked hard @ explanations if needed.
I enjoyed having her as an instructor &
look forward to more classes w/ her.

Steffi is one of the most effective professors at UNT. She is enthusiastic, realistic and interested in her students. Each class session was relevant.
